## Summary

Backend engineer with four years building payment and billing APIs in Go and Python. I care about reliable systems and clear on-call runbooks.

## Experience

Senior Backend Engineer, Kestrel Payments

Jan 2023 – Present

• Cut checkout API p95 latency from 620 ms to 380 ms by moving fraud scoring to an asynchronous Kafka consumer.

• Led the migration of 14 services from a shared MySQL database to per-service PostgreSQL schemas with zero downtime.

• Designed an idempotency layer for payment retries that removed duplicate charges, previously about 40 a month.

• Mentored three engineers and ran the team's weekly incident review.

Software Engineer, Lumen Billing

Jul 2021 – Dec 2022

• Built REST APIs in Python (FastAPI) for invoice generation used by 2,000 business customers.

• Wrote integration tests with pytest that raised coverage of the billing module from 45% to 82%.

• Containerised the services with Docker and set up CI/CD with GitHub Actions.

## Education

B.Tech, Computer Science and Engineering, National Institute of Technology, Tiruchirappalli

2017 – 2021

## Skills

Languages: Go, Python, SQL

Data: PostgreSQL, MySQL, Redis, Kafka

Infrastructure: Docker, Kubernetes, AWS, Terraform, GitHub Actions

Practices: System design, observability with Prometheus and Grafana, code review
